The Sumitomo Warehouse Co., Ltd. Notes to Consolidated Interim Financial Statements (Unaudited) 30 September 2004 and 2005

1. Basis of Presenting Consolidated Financial Statements

(a) The accompanying consolidated financial statements have been prepared in accordance with the provisions set forth in the Japanese Securities and Exchange Law and its related accounting regulations, and in conformity with accounting principles generally accepted in Japan ("Japanese GAAP"), which are different in certain respects as to application and disclosure requirements of International Financial Reporting Standards.

The accounts of overseas subsidiaries are based on their accounting records maintained in conformity with generally accepted accounting principles prevailing in the respective countries of domicile. The accompanying consolidated financial statements have been restructured and translated into English (with some expanded descriptions and the inclusion of consolidated statements of shareholders' equity) from the consolidated financial statements of the Company prepared in accordance with Japanese GAAP and filed with the appropriate Local Finance Bureau of the Ministry of Finance as required by the Securities and Exchange Law. Some supplementary information included in the statutory Japanese language consolidated financial statements, but not required for fair presentation, is not presented in the accompanying consolidated financial statements.

Certain reclassifications have been made in the previous consolidated interim financial statements to conform to the presentation for the current six month period.

(b) The translation of the Japanese yen amounts into U.S. dollars is included solely for the convenience of readers outside Japan, using the prevailing exchange rate at 30 September 2005, which was ¥113.19 to U.S. \$1. The convenience translations should not be construed as representations that the Japanese yen amounts have been, could have been, or could in the future be, converted into U.S. dollars at this or any other rate of exchange.

2. Significant Accounting Policies

(a) Consolidation

The consolidated financial statements include the accounts of the Company and 23 and 27 significant subsidiaries for the six months ended 30 September 2004 and 2005, respectively. All significant intercompany transactions and accounts have been eliminated. The fiscal six months end of all the consolidated foreign subsidiaries is 30 June and is different from the Company's. Significant transactions between 30 June and 30 September are reflected in the consolidated financial statements.

In the elimination of investments in subsidiaries, the assets and liabilities of the subsidiaries, including the portion attributable to minority shareholders, are evaluated using the fair value at the time the Company acquired control of the respective subsidiaries. Excess of cost over equity in net assets acquired is amortized within five years.

The equity method is applied to two subsidiaries and four affiliates for the six months ended 30 September 2004 and four affiliates for the six months ended 30 September 2005. Other unconsolidated subsidiaries and affiliates are not accounted for by the equity method because they are immaterial.

(b) Foreign currency translation

Monetary assets and liabilities denominated in foreign currencies are translated into Japanese yen at the rate at the end of each six month period and resulting gains and losses are recognized in the statements of income.

The financial statements of consolidated foreign subsidiaries and affiliates are translated into Japanese yen at the rate at the end of each six month period, except that shareholders' equity accounts are translated at historical rates.

(c) Allowance for doubtful receivables

The Company and its consolidated subsidiaries (the "Companies") provide for doubtful accounts principally at an amount computed based on the actual ratio of bad debts in the past plus the estimated uncollectible amounts based on the analysis of certain individual receivables.

(d) Securities

The Companies classify securities as 1) securities held for trading purposes (hereafter, "trading securities"), 2) debt securities intended to be held to maturity (hereafter, "held-to-maturity debt securities"), 3) equity securities issued by subsidiaries and affiliates, and 4) all other securities that are not classified in any of the above categories (hereafter, "available-for-sale securities").

The Companies have no trading securities.

Held-to maturity debt securities are stated at amortized cost.

Equity securities issued by subsidiaries and affiliates which are not consolidated or accounted for using the equity method are stated at moving average cost.

Available-for-sale securities with available fair market values are stated at fair market value. Unrealized gains and losses on these securities are reported, net of applicable income taxes, as a separate component of shareholders' equity. Realized gains or losses on sales of such securities are computed using moving-average cost. Other securities with no available fair market value are stated at moving average cost.

If the market value of held-to-maturity debt securities and available-for-sale securities, declines significantly, such securities are stated at fair market value and the difference between fair market value and the carrying amount is recognized as loss in the period of the decline. If the fair market value of equity securities issued by unconsolidated subsidiaries and affiliated companies not on the equity method is not readily available, such securities should be written down to net asset value with a corresponding charge in the income statement in the event net asset value declines significantly.

(e) Property and equipment

Property and equipment are carried at cost. The Company and its domestic subsidiaries provide depreciation on a declining balance method over estimated useful lives in accordance with Japanese tax laws. However, depreciation for buildings, except building fixtures, acquired after 31 March 1998 is stated on the straight-line method.

Consolidated foreign subsidiaries compute depreciation on the straight-line method over estimated useful lives.

In the six months ended 30 September 2005, the Company adopted the new accounting standard for impairment of fixed assets ("Opinion Concerning Establishment of Accounting Standard for Impairment of Fixed Assets" issued by the Business Accounting Deliberation Council on 9 August 2002) and the implementation guidance for the accounting standard for impairment of fixed assets (the Financial Accounting Standard Implementation Guidance No.6 issued by the Accounting Standards Board of Japan on 31 October 2003).

(f) Finance leases

Finance leases of the Company and certain consolidated subsidiaries which do not transfer ownership are accounted for in the same manner as operating leases in accordance with Japanese GAAP. Under Japanese accounting policies for leases, finance leases that deem to transfer ownership of the leased property to the lessee are to be capitalized, while other finance leases are permitted to be accounted for as operating lease transactions if certain information is disclosed in the notes to the lessee's financial statements.

(g) Software costs

The Company and its consolidated domestic subsidiaries depreciate software using the straight-line method over the estimated useful life of five years.

(h) Income taxes

The Companies recognize tax effects of temporary differences between the carrying amounts of assets and liabilities for tax and financial reporting. The asset and liability approach is used to recognize deferred tax assets and liabilities for the expected future tax consequences of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes.

(i) Bonuses

The Company and its consolidated domestic subsidiaries follow the general Japanese practice of paying bonuses mainly in June and December. Accrued bonus liabilities at the balance sheet date are calculated based upon management's estimate of annual amounts thereof.

Bonuses to directors and corporate auditors, which are subject to approval at the shareholders' meeting, are accounted for as an appropriation of retained earnings.

(j) Retirement benefits

i Employees:

The Company and its consolidated domestic subsidiaries provide two types of post-employment benefit plans, unfunded lump-sum payment plans and funded non-contributory pension plans, under which all eligible employees are entitled to benefits based on the level of wages and salaries at the time of retirement or termination, length of service and certain other factors.

The liabilities and expenses for retirement benefits are determined based on the amounts actuarially calculated using certain assumptions.

The Company and its consolidated domestic subsidiaries provide the liability for employees' retirement benefits at the balance sheet date based on the estimated amount of projected benefit obligation and the plan assets at that date.

Actuarial gains and losses are recognized in expenses using the straight-line method within the average of the estimated remaining service lives commencing with the following period.

ii Directors and corporate auditors:

Certain subsidiaries accrue the liability for directors' and corporate auditors' retirement benefits equal to the amount of their retirement payment required if they retired their positions at the balance sheet dates.

On 29 June 2005, the Company terminated its retirement benefits plan for directors and corporate auditors. The balance of benefits granted prior to the termination date is included in other non-current liabilities.

(k) Net income per share

The computations of basic net income per share of common stock shown in the consolidated statements of income are based on the weighted average number of shares outstanding during the period and net income available to common shareholders. The computation of dilutive net income per share of common stock is based on the weighted average number of shares of common stock outstanding increased by the number of shares which would have been outstanding assuming the conversion of outstanding dilutive bonds at the beginning of the period. The related interest expense, net of income taxes, has been eliminated for the purposes of this calculation.

(l) Cash and cash equivalents

Cash and cash equivalents include cash on hand, readily-available deposits and short-term investments, which are easily convertible into cash and present insignificant risk of changes in value, with original maturities of three months or less.

3. Securities

Total • • • • • • • • • • • • • • • • • • •	¥ 5,309	¥4,766	\$42,106
-			

6. Shareholders' Equity

Under the Commercial Code of Japan, the entire amount of the issue price of shares is required to be accounted for as capital, although a company may, by resolution of its Board of Directors, account for an amount not exceeding one-half of the issue price of the new shares as additional paid-in capital, which is included in capital surplus.

The Commercial Code of Japan provides that an amount equal to at least 10% of cash dividends and other cash appropriations shall be appropriated and set aside as a legal reserve until the total amount of legal reserve and additional paid-in capital equals 25% of common stock. The legal reserve and additional paid-in capital may be used to eliminate or reduce a deficit by resolution of the shareholders' meeting or may be capitalized by resolution of the Board of Directors. On condition that the total amount of legal reserve and additional paid-in capital remains being equal to or exceeding 25% of common stock, they are available for distribution by the resolution of shareholders' meeting. Legal reserve is included in retained earnings in the accompanying financial statements.

The maximum amount that the Company can distribute as dividends is calculated based on the non-consolidated financial statements of the Company in accordance with the Commercial Code.

7. Contingent Liabilities

At 30 September 2004 and 2005, the Companies were contingently liable as follows:

	Millions	of yen	Thousands of U.S. dollars
	2004	2005	2005
As endorser of notes endorsed·····	¥ 548	¥ 514	\$ 4,541
As guarantor of indebtedness·····	4,587	4,191	37,026

8. Segment Information

Total sales · · · · · · · · · · · · · · · · · · ·	412,280	39,367	(768)	450,879				
Operating cost · · · · · · · · · · · · · · · · · · ·	393,886	18,305	14,454	426,645				
Operating income	\$ 18,394	\$ 21,062	\$ (15,222)	\$ 24,234				

Corporate costs and expenses of ¥1,681 million and ¥ 1,723 million (*US\$ 15,222 thousand*) for six months ended 30 September 2004 and 2005, respectively, mainly consisted of expenses of administrative departments of the Company.

Effective April 1, 2005, the Companies shifted the warehouse and logistics facilities leasing operation from the Real Estate segment to the Logistics segment.

The Companies changed the classifications in the information by operational segment in accordance with that in the business management and the Mid-term Business Plan to achieve a better presentation of operations.

If the segment information for the six months ended 30 September 2004 was prepared using the new segmentation, such information would be as follows:

_	Millions of yen							
	Corporate							
Six months ended 30 September 2004	Logistics		Real estate		& Elimination		Consolidated	
Sales to outside customers · · · · · · · · · · · · · · · · · · ·	¥	44,282	¥	5,056	¥	-	¥	49,338

Operating income —	¥	1,746	¥	2,997	¥	(1,681)	¥	3,062

Sales of the consolidated foreign subsidiaries were immaterial. Accordingly, information by geographic segment is not disclosed.

Overseas sales, which represent sales to customers outside Japan, of the Companies were immaterial. Accordingly, overseas sales are not disclosed.

9. Impairment loss on fixed assets

The Company and its consolidated domestic subsidiaries grouped their business assets based on the business management units and assets for leasing based on each asset. The Company recognized impairment losses on a part of business assets due to the recent decline in land prices or deterioration of profitability and wrote them down to the recoverable amounts.

Impairment losses of \(\frac{1}{2}\) 804 million (US\$ 7,103 thousand) were recognized in the period ended 30 September 2005 consisting of losses on land.

The recoverable amounts of these business assets were their net realized values principally calculated based on estimated values by real estate appraisers.

The amount of recognized impairment losses was deducted directly from the acquisition costs of land.

10. Subsequent Event

At the Board of Directors' meeting of the Company held on 18 November 2005, the appropriation of retained earnings at 30 September 2005 was duly approved as follows:

		1 nousanas of	
_	Millions of yen	U. S. dollars	
Cash dividends at ¥ 5.0 (<i>U. S.</i> \$0.04) per share·····	¥ 909	\$ 8,031
